

The Luna Family

Nina is a hard-working mother, doing everything she can to make sure her children have what they need. Recently, she decided to switch to a third-shift position to accommodate the support needs for her special needs child this school year. Over the past several years, Nina, her daughter and two boys have had to move multiple times due to constantly rising rent costs. They currently rent a two-bedroom apartment in an 8-unit building, where they are overcrowded. The kids have limited play space and feel unsafe being outdoors.

Homeownership has been a long-time goal for their family. And until recently, it felt like a distant dream. Thanks to Lakeshore Habitat, they are on their way to having a house of their own sooner than they could have ever imagined. This new home at Vista Green will provide the safety and stability their family has been working toward; an opportunity for each child to flourish and thrive in community.
