

The Mcleod Family

From the very beginning, it was clear Metta was driven and committed to caring for her 4 boys. As a single mother, she has been working full-time managing a local hotel and taking college courses to earn a degree in hospitality management with a minor in marketing. Finding safe and affordable housing for her and her boys has been the most significant challenge. For the past 4 years they have had to live in a small trailer with repair and inefficiency issues, in an unsafe neighborhood.

When we shared the news they had been accepted into our program she could not believe it. Metta and her boys have been given hope as they imagine their new life in their Habitat home.
